INDEX TO VOLUME XXXII.

A.

Academy of Sciences, Paris—distribution of prizes, 95; prizes for next year, 97.
Acclimation—sheep, silkworm, 102; ostrich, cotton plant, 103.
Agricultural chemistry — soil-analysis — geological surveys of Kentucky and Arkansas, 233.
Agriculture and geology of Mississippi, *E. W. Hilgard*, 303.
Airy, G. B., errors of observation, 135.
Alcoholic spirits newly distilled contain copper, lead or tin, 114.
Allan, J. T., distribution of forest trees in Nebraska, 165.
Anatomical and zoological brochures, 303.
Anatomy, human, by *Joseph Leidy*, 149.
Ancient works in Western New York, *T. Apoleon Cheney*, 149.
Andrews, E. B., rock oil, its geological relations and distribution, 85.
Aniline green, or emeraldine, 417.
Arsenic as an impurity in zinc, *Eliot* and *Storer*, 380.
ASTRONOMY—
Asteroids recently discovered, 132, 291, 438.
Baily's Beads, *E. Blunt*, 292.
Comet discovered by Mr. Thatcher, 134.
Constitution of the planetary system and theory and tables of Mars, *U.-J. Le Verrier*, 222.
Discovery of the 71st asteroid, 438.
Errors of observation and combination of observations, *G. B. Airy*, 135.
Great comet of 1861, 252, 305.
Meteors, see *Meteorology*.
Re-discovery of Pseudo-Daphne, 438.
Atlantic and Pacific telegraph, 454.
Aurora borealis at Sacramento, Cal., *T. M. Logan*, 148.
Auroral exhibition of Aug. 28 and Sept. 4, 1859, and auroras generally, *E. Loomis*, 71, 318.

B.

Bache, A. D., chosen Foreign Associate of the French Academy, 455.
Bailey, L. W., appointed professor at Harvard College, 304.
Barral, influence of the atmosphere upon vegetation, 103.
Barrow, Isaac, mathematical works, 299.
Berthelot, synthesis in organic chemistry, 103.
Bibliography, *J. Nicklès*, 103.
Bigelow, A., freezing of water at Passaic chemical works, 205.
Billings, E., age of red sandstone of Vermont, 232, 454, *note*.
Bleu de Paris, 416.
Blunt, E., Baily's Beads, 292.
Bond, G. P., great comet of 1861, 255, 261.
Book notices, 110, 149, 299, 455.
Books received, 150.
BOTANY—
Annals of the Botanical Society of Canada, 1860-1861, 127.
Caricography, by *C. Dewey*, 38.
Class book of Botany, *Alphonso Wood*, 127.
Distribution of forest trees in Nebraska, *J. T. Allan*, 165.
Flora Hongkongensis—flowering plants and ferns of the island of Hongkong, *George Bentham*, 124.
Floræ Columbiæ terrarumque adjacentium specimina selecta, 289.
Martius, Flora Brasiliensis, 289.
Natural History Review, 1861, 130.
Proceedings of the Linnæan Society, 1861, 127, 289.
British Association, 31st Congress, with address of *Mr. Fairbairn*, 363.
Brush, G. J., chemical geology, carbonate of lime at high temperatures, 112.
crystalline form of hydrate of magnesia from Texas in Pennsylvania, 94.

C.

Cahours, history of organic radicals, 103.
Cambridge Museum of Comparative Zoology, 438.
Caricography, *C. Dewey*, 38.
Cassels, J. L., meteorite of Hindostan, 1857, 401.
Chemical and physical apparatus of Becker & Sons, *S. W. Johnson*, 298.
Chemical geology, carbonate of lime at a high temperature, both with fluxes and alone, *G. Rose*, 112.
CHEMISTRY—
Agricultural — Soil-analysis; notice of the agricultural chemistry of the geological surveys of Kentucky and Arkansas, *S. W. Johnson*, 233.
Aniline from coal-tar, *H. W. Perkin*, 267.
Arsenic as an impurity of metallic zinc, *Eliot* and *Storer*, 380.
Blast for laboratory use, *H. Sprengel*, 425.
Classification of organic substances by series, *J. Scheil*, 48.

British Association, 31st Congress, with address of *Mr. Fairbairn*, 363.
Brush, G. J., chemical geology, carbonate of lime at high temperatures, 112.
crystalline form of hydrate of magnesia from Texas in Pennsylvania, 94.

C.

Cahours, history of organic radicals, 103.
Cambridge Museum of Comparative Zoology, 438.
Caricography, *C. Dewey*, 38.
Cassels, J. L., meteorite of Hindostan, 1857, 401.
Chemical and physical apparatus of Becker & Sons, *S. W. Johnson*, 298.
Chemical geology, carbonate of lime at a high temperature, both with fluxes and alone, *G. Rose*, 112.
CHEMISTRY—
Agricultural — Soil-analysis; notice of the agricultural chemistry of the geological surveys of Kentucky and Arkansas, *S. W. Johnson*, 233.
Aniline from coal-tar, *H. W. Perkin*, 267.
Arsenic as an impurity of metallic zinc, *Eliot* and *Storer*, 380.
Blast for laboratory use, *H. Sprengel*, 425.
Classification of organic substances by series, *J. Scheil*, 48.

CHEMISTRY—
Cæsium and rubidium, 409.
Coloring matters derived from coal-tar, *H. W. Perkin*, 267, 416.
new, by decomposition of nitronaphthaline and dinitronaphthaline, *M. C. Lea*, 211.
Compound of ammonia, mercury, and nitric acid, *M. Carey Lea*, 374.
Conversion of monobromid of ethylene into acetolene, 414.
Copper, lead and tin in newly-distilled alcoholic spirits, *A. A. Hayes*, 114.
Einleitung in das Studium der Organischen Chemie, von *J. Schiel*, 111.
Ethyl bases, production of, *M. C. Lea*, 25.
exact separation, *M. C. Lea*, 26.
Ethyl, nitrate and nitrite, *M. C. Lea*, 177.
Fuchsine or magenta from coal-tar, *H. W. Perkin*, 271.
Indisine, 268.
Keroselene, a new anæsthetic, *F. H. Storer*, 276.
Lead in aqueduct pipes, local corrosion of, *J. R. Nichols*, 115.
Leçons de Chimie professées en 1860, 1 vol. 8vo. *Pasteur* upon molecular dissimilarity; *Cahours* on organic radicals; *Wurtz* upon the glycols; *Berthelot* on synthesis in organic chemistry; *H. St. Claire Deville* on numerical laws in chemistry, and the variation of their constants; *Barral*, influence of the atmosphere on vegetation; *Dumas*, Historic memoirs concerning Lavoisier and Leblanc, 103.
Mathematical theory of homologous series, 413.
Mauve, 268.
Natro-boro-calcite and another borate in gypsum of Nova Scotia, *H. How*, 9.
Nature of deposit upon copper in Reinsch's test for arsenic, 117.
Nicotine, quantity produced annually, 454.
Organic acids, 412.
Ozone a restorer of faded engravings, *Gorup-Besanez*, 275.
Ozone, nitrous acid and nitrogen, *T. S. Hunt*, 109.
Phenamine, 268.
Picramic acid, *M. C. Lea*, 210.
Picric acid, *M. C. Lea*, 180.
Polyglyceric alcohols and anhydrids, 108.
Preparation of hydrate of baryta, 118.
Reduction of sulphuric acid by nascent hydrogen, *Kolbe*, 412.
Reinsch's test for arsenic not applicable to solutions containing arsenic acid, *Werther*, 277.
Roseine from coal-tar, *H. W. Perkin*, 270.
Salts of chlorine and other electro-negative elements, 108.
Saponification by alkaline carbonates in the dry way, 117.
Semi-metals, new characteristic of, *J. Nicklès*, 416.
Sulphate of copper, action of, as a preservative of wood, *Koenig*, 274.
Thalium, name, applied to new metal from thalite, 411.
CHEMISTRY—
Thalium, new element, *Crookes*, 411.
Tyrian purple from coal-tar, *H. W. Perkin*, 268.
Urea, preparation of, from ferrocyanid of potassium, *M. C. Lea*, 179.
Violine from coal-tar, *H. W. Perkin*, 270.
Cheney, T. A., ancient works in Western New York, 149.
Coal formations and coal plants of the United States, *L. Lesquereux*, 15.
Coloring matters derived from coal-tar, *H. W. Perkin*, 267, 416.
Comet, dimensions of Donati's, *W. A. Norton*, 54.
Comet I of 1861, 134; II, 253, 305, 439.
Cooke, Geo. H., age of white limestone at the zinc mines in New Jersey, 208.
Cordier, P. L. A., obituary, *J. Nicklès*, 101.
Crystalline form of hydrate of magnesia from Texas, Penn., *Geo. J. Brush*, 94.
Cyclopedia, new American, 455.

D.

Dauber, Hermann, obituary notice of, 150.
Dean, J., microscopical anatomy of the spinal cord and mode of examination, 302.
Deville, H. St. Claire, numerical laws in chemistry and the variation of their constants, 103.
reproduction of certain crystalline minerals, 415.
Dewey, C., caricography, 38.
Donati's comet, dimensions of, by *W. A. Norton*, 54.
Dub, Julius, Der Electro-magnetismus, 110.
DuChaillu's collection in natural history, noticed by *Owen*, 435.
Dumas, historic memoirs concerning Lavosier and Leblanc, 103.

E.

Earthquake at Mendosa, 148.
at Syracuse, N. Y., July 11, 1861, 297.
of Aug. 31, 1861, *J. M. Gillis*, 453.
on the island of Penang, *J. M. Gillis*, 297.
Earthquakes at Sacramento, Cal., 1860, *T. M. Logan*, 148.
Eckfeldt, natural dissemination of gold, 297.
Eliot, C. W., arsenic as an impurity of zinc, 380.
Emeraldine, or aniline green, 417.
Emerson, E., improvement in stereoscope, 403.
improvements proposed by Sir David Brewster in the photographic camera, examined, 227.
a rapid collodion; a rapid dry photographic process, 426.
Evans, E. W., path and velocity of the Guernsey Co. (Ohio) meteorite, May 1, 1860, 30.
Evans, John, life and scientific services of, by *C. T. Jackson*, 311.

F.

Fairbairn's address as President of British Association at Manchester, 363.
Forest trees of Nebraska, *J. T. Allan*, 165.

G.

Genth, F. A., Haidinger's reports and theory of meteorites, 135, 440.
Geological relations and distribution of Rock oil, *E. B. Andrews*, 85.
surveys of Kentucky and Arkansas, agricultural chemistry of, 233.
survey of Michigan, 303.
survey of Wisconsin, 454.
GEOLOGY—
Age of Red sandstone of Vermont, *E. Billings*, 232; *C. Hitchcock*, 454.
Age of white limestone of New Jersey Zinc mines, *G. H. Cooke*, 208.
and agriculture of Mississippi, *E. W. Hilgard*, 303.
Bone bed at Phœnixville, Pa., in Mesozoic red sandstone, *C. M. Wheatley*, 41.
Coal formations of North America, Coal Plants and their study, 15.
Coal, comparative sections of in U. S., *Lesquereux*, 118; *Lesley*, 281.
Families, genera and species of coal plants in the United States, *L. Lesquereux*, 193.
Fossils from the Palæozoic rocks of the Western States, *J. H. McChesney*, 122.
Fossil fruits with Lignite of Brandon, Vt., *L. Lesquereux*, 355.
Goniatite limestone at Rockford, Ind., its age and relations to the "Black Slate" of the Western States, *F. B. Meek* and *A. H. Worthen*, 167, 288.
Kentucky geological survey, *L. Lesquereux* and *J. Lesley, Jr.*, 118.
Natural dissemination of gold, *Eckfeldt*, 297.
Origin of some magnesian and aluminous rocks, *T. S. Hunt*, 286.
Palæontology, *J. Hall*, 430.
Primordial Zone of Texas, new fossils, *B. F. Shumard*, 213.
Reply to Mr. Marcou's strictures, Cretaceous and Carboniferous rocks of Texas, *F. B. Meek*, 278.
Taconic System, *T. S. Hunt*, 427.
Trilobites from Wisconsin Potsdam, correction, *F. H. Bradley*, 149.
Gibbs, W., Physics and Chemistry, extracts, 104.
Notices of books, 110.
Gilliss, J. M., comet II, 1861, 254, 265, 305.
earthquake at Penang Island, 297; at Washington, Aug. 31, 453.
Glycerine employed in surgery, 98.
Gold of Nova Scotia, *O. C. Marsh*, 395.
Gorilla of DuChaillu's collection, *Owen*, 435.
height of, *J. E. Gray*, 437.
Gray, A., botanical notices, 124, 289.
Gray, J. E., height of the gorilla, 437.
Gyrolite with calcite in apophyllite in the trap of the Bay of Fundy, *H. How*, 13.

H.

Haidinger, Wm., notices of meteoric masses, directions for observations on meteors, 440.
on meteoric falls and theory of form of meteors, 135.
Hall, A., elements of great comet of 1861, 259.
Hall, James, Palæontology, 430.
Geological survey of Wisconsin, 454.
Hayes's Arctic expedition, return of, 451.
Hayes, A. A., copper, lead and tin in alcoholic spirits, 114.
Herrick, E. C., meteoric observations, New Haven, Conn., April 20, July 3, and Aug. 10, 1861, 294.
Auroral record, 81.
Heuzé, Les Plantes Industrielles, 104.
Hilgard, E. W., geology and agriculture of Mississippi, 303.
Hitchcock, C., note on red sandstone of Vermont, 454.
How, H., gyrolite, 13.
natro-boro-calcite and another borate in the gypsum of Nova Scotia, 9.
Hunt, T. S., origin of some magnesian and aluminous rocks, 286.
ozone, nitrous acid and nitrogen, 109.
Taconic system of Dr. Emmons, 427.

I.

Ives, Dr. Eli, obituary of, 455.

J.

Jackson, C. T., sketch of life and scientific services of John Evans, M.D., 311.
Johnson, S. W., agricultural chemistry—soil analysis: notice of agricultural chemistry of the geological surveys of Kentucky and Arkansas, 233.

K.

Kerl, Bruno, Handbuch der Metallurgischen Hüttenkunde, 150.
Koenig, action of sulphate of copper as a preservative of wood, 274.
Kolbe, reduction of sulphuric acid by nascent hydrogen, 412.

L.

Lavoisier, unpublished memoir by, 98.
Lea, M. Carey, compound of ammonia, mercury and nitric acid, 374.
ethyl bases, exact separation of, 26.
production of, 25.
history of picric acid, 180.
new coloring matters produced by decomposition of nitronaphthaline and dinitronaphthaline, 211.
nitrate and nitrite of ethyl, 177.
picramic acid, 210.
urea prepared from ferrocyanid of potassium, 179.
Leçons de Chimie professées en 1860, 103.
Leidy, Joseph, human anatomy, 149.
Lesley, J. P., note on Lesquereux's table of comparative sections of coal measures, 281.

Lesley, Joseph, Jr., topographical and geological report of the eastern coal fields of Kentucky, 118.
Lesquereux, L., coal formations of North America, 193.
coal plants of the United States, and their study, 15.
fossil flora, and stratigraphical distribution of coal in Kentucky, 118.
fossil fruits among lignites of Brandon, Vt., 355.
Le Verrier, U. J., planetary system and tables of Mars, 222.
Lewis, J. C., rain following the discharge of ordnance, 296.
Logan, T. M., meteorological observations at Sacramento, Cal., for 1860, &c., 147.
Loomis, E., astronomical notices by, 132, 291, 438; auroras of Aug. 28 to Sept. 4, 1859, 71, 318.
coincidence of Aurora Borealis and Australis, 81.

M.

Magnetic needle deflections observed during auroras, 327.
Magnus, propagation of heat in gases, 104.
Mahla, F., polarizing powers of American oil of turpentine, 107.
Marsh, B. V., meteoric observations, Aug. 10, 1861, 448.
Marsh, O. C., gold of Nova Scotia, 395.
Mattiessen, new unit of electrical resistance, 105.
M'Chesney, J. H., fossils from palæozoic rocks of the Western States, 122.
McMillan, S. B., remarkable rain-fall in Ohio, 296.
Medical science, summary of, *Walter S. Wells*, 303.
Meek and *Worthen* on goniatite limestone at Rockford, Ind., its age, &c., 167, 288.
Meek, F. B., reply to Mr. Marcou's strictures relating to Cretaceous and Carboniferous rocks of Texas, 278.
Metallurgy: Handb. des metallurgischen Hüttenkunde, von *Bruno Keil*, 150.
Meteor of Guernsey Co., Ohio, May 1, 1860, path and velocity, *E. W. Evans*, 30.
Meteoric observations, Aug. 10, 1861, *E. C. Herrick*, 294; Oct. 4, 1851, 443.
Meteorite from Hindostan, 1857, *J. L. Cassels*, 401.
Meteorology—
Abstract of meteorological observations for 1860, with averages of 8 years at Sacramento, Cal., *T. M. Logan*, 147.
August meteors, *A. C. Twining*, 444,
Grand meteor of Aug. 10, 1861, *H. A. Newton*, 448.
Haidinger's reports of fall of meteors and theory of meteorites, viz., Hraschina near Agram: Leitform, or typical form of meteorites, 137; meteors of St. Denis-Westrem, 140; Calcutta meteorites, 141; meteoric iron from Tula, Russia, 144; meteoric iron from Nebraska, 145; Australia, 442; notices of meteoric masses, 440.
Magnetic observations of mission to India and High Asia, 1854 to 1858, 300.
Meteorology—
Meteor, remarkable, of Oct. 4th, 1861, 443.
Rain following the discharge of ordnance, *J. C. Lewis*, 296.
Remarkable rain-fall in Ohio, *S. B. McMillan*, 296.
Michigan geological survey, 303.
Microscopic anatomy of the spinal cord, and mode of examination, *J. Dean*, 302.
Miller, W. A., photographic spectra, 408.
Minerals—
Gyrolite with calcite in apophyllite in trap of the Bay of Fundy, *H. How*, 13.
Minerals, reproduction of certain crystalline, 415.
Mississippi, report on geology and agriculture of, *E. W. Hilgard*, 303.

N.

National observatory, 148.
Newton, H. A., grand meteor of Aug. 10, 1861, 448.
elements of meteoric ring of August, 450.
Nichols, J. R., local decomposition of lead in aqueduct pipes, 115.
Nicklès, J., a new characteristic of the so-called semi-metals, 416.
correspondence of, 95.
Les electro-aimants et l'adherence magnetique, 111.
Nitroso-phenyline, 417.
